BUSINESS PROPOSAL

For Establishing a Research & Development Centre

Sample 1

This text is edited

Decide in advance what classes your model should detect (e.g., Man/Woman).

Check your dataset.yaml, and remember the index for each class.

When labeling, assign the class ID according to your YAML:

Man ? 0

Woman ? 1

Ignore any other objects (don’t include them in .txt)

Never mix unrelated objects unless you add them as new classes in YAML.

Sample 2

Decide in advance what classes your model should detect (e.g., Man/Woman).

Check your dataset.yaml, and remember the index for each class.

When labeling, assign the class ID according to your YAML:

Man ? 0

Woman ? 1

Ignore any other objects (don’t include them in .txt)

Never mix unrelated objects unless you add them as new classes in YAML.
