BUSINESS PROPOSAL

For Establishing a Research & Development Centre

Dear Divya.P,

We are pleased to inform you that Makeclouds Digital Transformations is offering you an Internship in Python with Generative AI. Your skills, enthusiasm, and academic background have impressed us, and we are excited to have you join our team.

Internship Details:

- Department: B.Tech (Information Technology)
- College: Er. Perumal Manimekalai College of Engineering, Hosur
- Domain: Python with Generative AI
- Duration: 3 Months
- Internship Period: 2nd February 2026 to 30th April 2026
- Stipend: ?8,000

Responsibilities:

Assist in the design and development of Python-based applications.

Work on Generative AI concepts, models, and real-time implementations.

Participate in project discussions and contribute innovative ideas.

Document project progress and prepare technical reports.

Learn and implement practical solutions for industry-oriented projects.

We believe this internship will provide you with valuable industry exposure and help you enhance your technical and professional skills. Please confirm your

acceptance of this offer by replying to this email or by signing and returning a copy of this letter on or before the specified confirmation deadline.

We look forward to welcoming you to Makeclouds Digital Transformations and supporting your growth in the field of Python and Generative AI.
